DENTAL NEWS

TIPS FROM THE TOOTH FAIRY

Did you know?? Teeth should be brushed TWICE a day. Many of our patients are telling us that they are only brushing once, at night, before they go to bed. It is highly recommended that this happen in the morning before school as well to prevent your child getting early gum disease. A very small, very soft toothbrush should be used with a fluoride toothpaste. This is especially important for those on rain water tanks, bore water or if you have a filter on your taps. It is also recommended

that parents supervise tooth brushing as often as possible and assist children up to about 8 years of age when they develop the dexterity to do it by themselves. Watch this space for more dental health tips.
